Add two  
feet and a  
magnet  
with a LED  
light

# Pocket Extension Magnet & LED light

Model  
PMG2

The PMG2 pocket extension magnet and LED light is great for picking up anything that may have fallen through the cracks. The LED light illuminates nameplates, hardware, or anything hidden in the dark. It extends to over two feet to pick up dropped items from hard to reach places.

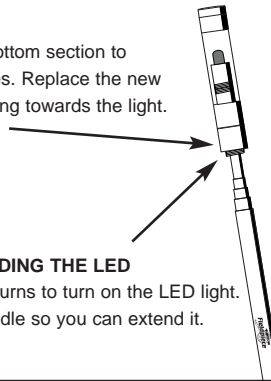

## Features

- Telescopes between 5 ¼" and 25 ½".
- Bright white LED to light the darkest of places.
- Clips to your pocket just like a pen.
- Picks up over 3 lbs.
- Closes to the size of a small pen.

## Operator's Guide

### BATTERY REPLACEMENT

Unscrew top section from bottom section to expose the (3) L736 batteries. Replace the new batteries with the + side facing towards the light.

### TURNING ON AND EXTENDING THE LED

Twist the handle about two turns to turn on the LED light. This will also unlock the handle so you can extend it.
