Clamp Readings in Job Link™ App

The new SC460 and SC660 wireless clamp meters team up with the Job Link system to provide even more in-depth testing, diagnostics and reports.

Clamp readings are wirelessly sent to the Job Link System via the long range JL2 Transmitter. Email reports and store them in the cloud for future reference.

Plus, now you can document both power and system efficiency (SEER and EER) in Job Link with the wireless clamps and wireless psychrometer.

- Live Measurements
- Trusted Diagnostics
- Inspection Checklists
- Cloud Storage
- Report Emailing
- Power and System Efficiency Calculations

Wireless Digital Manifolds models
SMAN4, SMAN440, SMAN460

Wireless Transmitter
model JL2

Wireless Dual In-duct
Psychrometer model SDP2

Wireless Clamp Meter
model SC660
