

LIGHT WEIGHT REFRIGERANT SCALE

Small but mighty.

This refrigerant scale is big enough to comfortably fit a canister, but compact and light weight enough to carry easily.

Heavy Duty

It has the ruggedness needed for HVACR, with thick aluminum walls to maintain accuracy, and rubber feet and rubber pad to soften the impact of daily use.

Charging and Recovery Alarms

Quickly set a charge or recovery alarm using the big numeric keypad without scrolling digits.

Easy to Carry

Weighing less than seven pounds, and housed in a heavy duty soft-sided case, the refrigerant scale is easy to throw over your shoulder when you need to carry other things or climb a ladder.

Residential and Light Commercial Refrigerant Scale, SRS1

- Charge/Recover Weight Alarms
- Water Resistant
